1. INTRODUCTION

Cobre Panamá is an open-pit copper mining operation located approximately 120 kilometres west of Panama City and approximately 20 kilometres in straight line from the Caribbean Sea coast, in the district of Donoso, Colon province, in the Republic of Panamá.

Cobre Panama is operated by Minera Panama S. A. (“MPSA” or “the Company”), a subsidiary of First Quantum Minerals Ltd. and commenced production in 2019, with an expected operating life of 37 years.

The topography in the concession area is low elevation (less than 300 metres above sea level), but rugged with and covered by tropical rainforest. Roads within the project area are not paved, they are either improved with coarse rock or unimproved. Climatic conditions are tropical with high levels of precipitation, high humidity and relatively high temperatures of 25°C to 30°C year-round.
